

## TOPGRASS GRAZING MIXTURES

### DAIRYGEN Intensive Grazing (5+ years)

(13-15kg/acre) (32-37kg/ha) Contains **GroMax** by DLF

- Intensive grazing aimed at pursuing more production from grazed grass
  - Palatability, persistency and stress tolerant
  - 65% Diploid Perennials for high sward density
  - Abergreen exhibits superb autumn growth extending the grazing season
  - Aberbann a high sugar grass that adds exceptional grazing D-value and ME yield
  - Hipast Perennial Tall Fescue Plus for added stress tolerance
  - Addition of Nashota a Tetraploid with extreme density
  - Available with white clover
  - Heading date 22nd May – 16th June
- 12.5% ABERGREEN Dip Int Perennial Ryegrass**  
**12.5% NIFTY Dip Int Perennial Ryegrass**  
**20% ABERBANN Dip Late Perennial Ryegrass**  
**20% BOWIE Dip Late Perennial Ryegrass**  
**20% HIPAST Perennial Fescue Plus™**  
**15% NASHOTA Tet Late Perennial Ryegrass**

## TOPGRASS PERMANENT PASTURE MIXTURES

### ALL GRAZE Permanent Pasture (7+ years)

(13-15kg/acre) (32-37kg/ha) Contains **GroMax** by DLF

- Flexible long term consistent grazing mixture
  - 51% Diploid Perennials selected for their superb grazing quality
  - Hipast Perennial tall fescue plus for grazing yield, persistency and stress tolerance
  - Specific grazing clovers bring a regenerative focus to the mixture. Available without clover
  - Suitable for all livestock
  - Timothy inclusion for early bite and later autumn grazing
  - Heading date 22nd May – 16th June
- 15% ABERGREEN Dip Int Perennial Ryegrass**  
**15% NIFTY Dip Int Perennial Ryegrass**  
**10.5% ABERBANN Dip Late Perennial Ryegrass**  
**10.5% BOWIE Dip Late Perennial Ryegrass**  
**20% HIPAST Perennial Tall Fescue Plus™**  
**15% NASHOTA Tet Late Perennial Ryegrass**  
**7% COMER Timothy**  
**7% WHITE CLOVER BLEND**

## TOPGRASS OVERSEEDING MIXTURES

### LEYBOOSTER ALL PURPOSE Overseeding

(10kg/acre) (25kg/ha) Contains **ProNitro**™

- Suitable for sowing after cutting or hard grazing in spring or autumn
  - Tops up sward by preventing weed grass ingress
  - Improves quality of sward
  - Contains ProNitro to improve establishment vigour
  - Available without clover
  - Heading date 30th May – 9th June
- 30% DIWAN Tet Int Perennial Ryegrass**  
**30% THEGN Tet Late Perennial Ryegrass**  
**30% HOPI Tet Late Perennial Ryegrass**  
**10% DUBLIN White Clover Blend**

## TOPGRASS RED CLOVER MIXTURES

### NYTROGEN Multicut Red Clover (2-3 years)

(12-14kg/acre) (30-35kg/ha) Contains **GroMax** by DLF

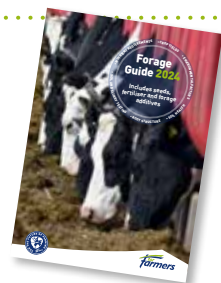

- 60% Ryegrass Plus for high yields and quality with stress tolerance
  - High inclusion of Red Clover for high protein silage yields
  - Lofa, greater persistency than Italian based Ryegrass
  - Astoncrusader, joint highest yielding Tetraploid for early spring growth
  - Deep rooting cultivars will improve soil structure and fertility whilst withstanding extremes of the seasons
  - Heading date 20th – 25th May
- 30% PERSEUS Italian Ryegrass Plus™**  
**10% PERUN Italian Ryegrass Plus™**  
**20% LOFA Hybrid Ryegrass Plus™**  
**20% ASTONCRUSADER Tet Hybrid Ryegrass**  
**10% AMOS Red Clover**  
**10% SINOPE Red Clover**

### PROTOGEN Multicut Red Clover (3-4 years)

(12-14kg/acre) (30-35kg/ha) Contains **GroMax** by DLF

- Lofa and Aberniche combines yield and forage quality with excellent stress tolerance
  - High quality intensive cutting mixture with high levels of protein due to Red Clover inclusion
  - Aberspey and Aberzeus both have the highest D-value and ME yields on the recommended list
  - Contains Aberclaret, an exceptionally persistent Red Clover increasing yield and protein content
  - Heading date 20th – 27th May
- 30% LOFA Hybrid Ryegrass Plus™**  
**10% ABERNICHE Festulolium**  
**16% ABERIMAGE Tet Hybrid Ryegrass**  
**24% ASTONCRUSADER Tet Hybrid Ryegrass**  
**5% AVISTO Red Clover**  
**15% ABERCLARET Red Clover**

## TOPGRASS SHORT TERM MIXTURES

### PRIMOGEN Italian Ryegrass Plus (1-2 years)

(14-16kg/acre) (35-40kg/ha)

Contains **GroMax**  
by DLF

- High yielding mixture up to two years duration
- Includes Perseus Italian Ryegrass Plus for persistency, yield, quality and stress tolerance
- Multiple cuts of leafy, high quality silage
- Incorporates Kigezi, one of the highest yielding Italian Ryegrasses across two full growing years
- Rapid regrowth and very responsive to fertiliser
- Includes Sendero, one of the highest yielding Italian Ryegrasses for early spring growth
- Heading date 19th – 25th May

**40% PERSEUS Italian Ryegrass Plus™**  
**30% SENDERO Dip Italian Ryegrass**  
**30% KIGEZI Tet Italian Ryegrass**

### SILOGEN Multicut Silage (2-3 years)

(14-16kg/acre) (35-40kg/ha)

Contains **GroMax**  
by DLF

- Excellent for intensive silage production
- 80% Ryegrass Plus varieties for persistency, yield, quality and stress tolerance
- Deep rooting so will withstand extremes of seasons
- Will provide multiple quality cuts through the season
- Rapid regrowth and responsive to fertiliser
- Lofa, with greater persistency than Italian based Ryegrass
- Astoncrusader, joint highest yielding tetraploid for early spring growth
- Heading date 20th – 25th May

**40% PERSEUS Italian Ryegrass Plus™**  
**10% PERUN Italian Ryegrass Plus™**  
**30% LOFA Hybrid Ryegrass Plus™**  
**20% ASTONCRUSADER Tet Hybrid Ryegrass**

### SPRINTER Italian / Westerwolds (1-2 years)

(13-16kg/acre) (32-40kg/ha)

Contains **GroMax**  
by DLF

- Very vigorous in establishment
- Responsive to high fertiliser inputs
- Very good disease resistance
- Short term mixture ideal for spring sowing
- Heading date 19th - 22nd May

**50% LOLAN Tet Westerwolds Ryegrass**  
**50% FOX Dip Italian Ryegrass**

### LISTED ITALIAN Short Term Italian (1-2 years)

(13-16kg/acre) (32-40kg/ha)

Contains **GroMax**  
by DLF

- Short term mixture made up of 100% of recommended listed Italian Ryegrass varieties
- 60% Diploid / 40% Tetraploid Italian
- Rapid establishment
- Includes Sendero, one of the highest yielding Italian Ryegrass for early spring growth
- Incorporates Kigezi, one of the highest yielding Italian Ryegrass across two full growing years
- Primarily for cutting but can be autumn aftermath grazed
- Heading date 19th - 23rd May

**30% SENDERO Dip Italian Ryegrass**  
**30% FOX Dip Italian Ryegrass**  
**40% KIGEZI Tet Italian Ryegrass**

## TOPGRASS MEDIUM TERM MIXTURES

### INTOGEN Cut and Graze (3-4 years)

(13-15kg/acre) (32-37kg/ha)

Contains **GroMax**  
by DLF

- High yielding and quality silage cutting and grazing mixture
- Hybrid/Tetraploid inclusion provides high yielding cuts
- Diploid Perennial Ryegrass included to add excellent density to the ley
- Aber high sugar grass inclusion provides exceptional D-value
- Seagoe included for high quality cutting yields
- Includes a blend of clovers with various leaf sizes. No clover option available
- Heading date 21st May – 6th June

**15% ASTONCRUSADER Tet Hybrid Ryegrass**  
**15% TETRAGRAZE Tet Hybrid Ryegrass**  
**17% NIFTY Dip Int Perennial Ryegrass**  
**15% ABERZEUS Dip Int Perennial Ryegrass**  
**14% SEAGOE Tet Int Perennial Ryegrass**  
**17% ABERLEE Dip Late Perennial Ryegrass**  
**7% WHITE CLOVER BLEND**

### EXTRAGEN Multicut Silage (3-4 years)

(13-15kg/acre) (32-37kg/ha)

Contains **GroMax**  
by DLF

- Lofa and Aberniche combines yield and forage quality with excellent stress tolerance
- High quality intensive cutting mixture
- Will provide excellent aftermath grazing
- Aberspey and Aberzeus both have the highest D-value and ME yields on the recommended list
- An option with 7% white clover cutting blend is available
- Heading date 20th – 29th May

**35% LOFA Hybrid Ryegrass Plus™**  
**25% ABERIMAGE Tet Hybrid Ryegrass**  
**10% ABERNICHE Festulolium**  
**15% ABERZEUS Dip Int Perennial Ryegrass**  
**15% ABERSPEY Tet Int Perennial Ryegrass**

## TOPGRASS STRESS TOLERANT MIXTURES

### EXTREME Dual Purpose (3-4 years)

(13-15kg/acre) (32-37kg/ha)

Contains **GroMax**  
by DLF

- Dual purpose high quality cutting mixture with the option to graze later in the season
- Ryegrass Plus are deep rooting and can tolerate both drought and wetter conditions
- Hipast a long lived Perennial type Festulolium that has exceptional density and retains the stress tolerance
- Lofa, greater persistency than Italian based Ryegrass
- Thegn is an exceptionally dense deep rooting tetraploid variety which will increase density of ley
- Includes a blend of white clovers with various leaf sizes. Available without clover
- Heading date 20th May - 6th June

**10% PERUN Italian Ryegrass Plus™**  
**19% PERSEUS Italian Ryegrass Plus™**  
**30% LOFA Hybrid Ryegrass Plus™**  
**17% HIPAST Perennial Fescue Plus™**  
**17% THEGN Tet Late Perennial Ryegrass**  
**7% WHITE CLOVER BLEND**

## TOPGRASS LONG TERM MIXTURES

### TROGEN Cut and Graze (5+ years)

(13-15kg/acre) (32-37kg/ha)

Contains **GroMax**  
by DLF

- Superb combination of varieties for yield and quality for all dual purpose requirements
- Timothy inclusion makes this ideal for improved spring and autumn growth
- Suits all livestock systems silage, hay and grazing
- Aberzeus and Aberbann high sugar grasses add exceptional grazing D-value and ME yield
- Nashota, highest ground cover for a Tetraploid Perennial Ryegrass
- Includes a blend of white clovers with various leaf sizes
- Available without clover or timothy
- Heading date 22nd May – 6th June

**12% AGASKA Dip Int Perennial Ryegrass**  
**12% ABERZEUS Dip Int Perennial Ryegrass**  
**21% SEAGOE Tet Int Perennial Ryegrass**  
**10% ABERBANN Dip Late Perennial Ryegrass**  
**10% SWAN Dip Late Perennial Ryegrass**  
**21% NASHOTA Tet Late Perennial Ryegrass**  
**7% COMER Timothy**  
**7% WHITE CLOVER BLEND**

### CONSERVAGEN Cutting (5+ years)

(13-15kg/acre) (32-37kg/ha)

Contains **GroMax**  
by DLF

- High performance cutting ley focusing on high quality multiple cuts
- 100% Perennial Ryegrass to ensure excellent quality and persistency
- Nolwen and Convey both show high levels of persistency
- Aberzeus included to improve density within the ley
- Nashota has the top rated density of all Tetraploids
- Heading date 23rd May - 5th June

**20% CONVEY Tet Int Perennial Ryegrass**  
**20% ABERZEUS Dip Int Perennial Ryegrass**  
**20% NOLWEN Tet Int Perennial Ryegrass**  
**20% ABERBANN Dip Late Perennial Ryegrass**  
**20% NASHOTA Tet Late Perennial Ryegrass**
